

## modular matting system connect

# Easy – Effective – Flexible

First impressions count, so protect your entrance area with the new CONNEXX CONNECT modular matting system. Keep floors looking clean and tidy and don't give dirt a chance!

CONNEXX offers easy, clean and flexible system solutions for every entrance area – inside and outside. With minimum effort, the clean-off zone can be overlaid with modules, which can be perfectly adapted to your specific requirements and design. Different versions allow you to adapt the product depending on how it is to be used. In terms of design, the entrance mats are adapted to the environment and the combination of different colours allows individual patterns to be applied. The safety knife makes easy work of cutting, enabling the personal touch to be added in no time at all, CONNEXX can be installed into any shaped matwell or entrance area just using a safety knife, straight edge and rubber hammer.

Dirt remains trapped within the matting keeping the inside as clean as possible. This is CONNEXX easy – effective – flexible.

# At a glance

## Installation

- ✓ Make sure the floor is level and clean
- ✓ Use a rubber hammer to connect the units together

## Make it your very own

- ✓ Use a sharp knife to cut out custom shapes
- ✓ Simply cut off any excess modules

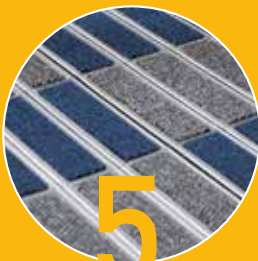

## Easy to store

- ✓ The mats are delivered stacked in boxes, each of which will cover an area of 1 m<sup>2</sup>
- ✓ Storage without sacrificing space

## Cleaning and care

- ✓ Vacuum-brush

## Pattern & Design

- ✓ Design individual patterns by combining mats of different colours
- ✓ Available in 8 dirt-resistant colours

## Outside & Inside

- ✓ Solution for indoor and outdoor areas
- ✓ Outside, coarse dirt is removed and inside, damp dirt and residual dirt is collected

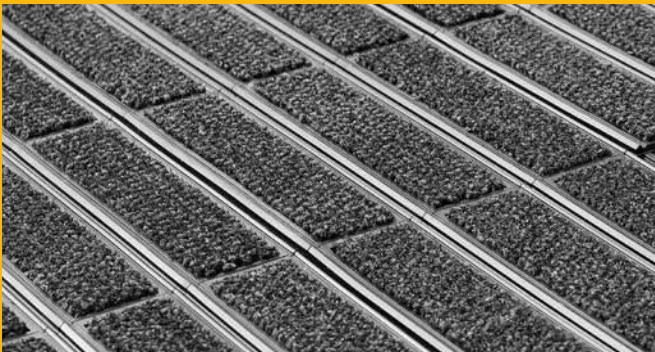

# Individually or combined

With CONNEXX, you can turn an entrance area into a clean-off area in no time at all – in an indoor area or outdoor area or both areas combined. Providing the entrance area with optimum protection against dirt and moisture.

## Zone 1

The outdoor mat for the outdoor area collects large amounts of coarse dirt thanks to its perforated structure. The design also guarantees that the moisture runs off. The outdoor mat can be cut to specific sizes just like the indoor mat, allowing it to be adapted to the spatial conditions.

## Zone 2

In zone 2, the wear-resistant indoor mat with a textile inlay effectively protects the entrance area against fine dirt and moisture.

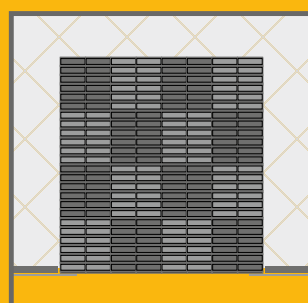

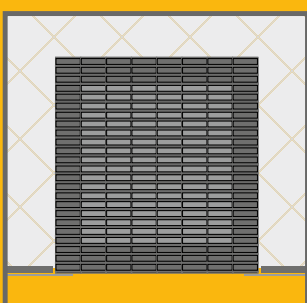

## Zone 1+2

When combined, the indoor and outdoor modules provide maximum effectiveness and the visual freedom to create the design you want. If required, the outdoor modules can also be combined with the indoor modules for indoor areas (only at a height of 17 mm).

## Combinations

When creating the design, all the available colours can be freely combined. It is also possible to apply a chessboard pattern, grid design or uniform surfaces.

# Installation – Step by step

## Delivery

CONNECT modules are delivered in boxes (1 box = 16 modules = 1 m<sup>2</sup>). They are stacked to save space, so that any items you do not use can easily be put into storage until a later date. Note: Colours may differ from one production batch to the next. Goods purchased at different times should be stored and laid separately.

## Connection

Simply connect the required number of tiles together to cover the floor with the CONNECT system. Use a rubber hammer to secure up the joins if necessary. No other tools are required.

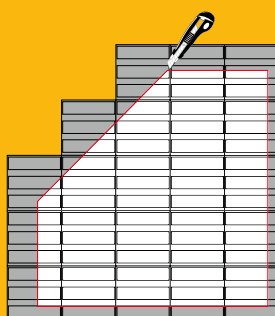

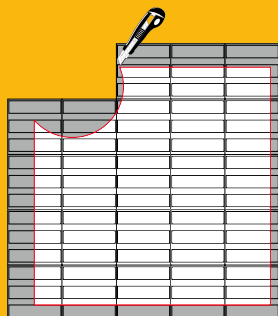

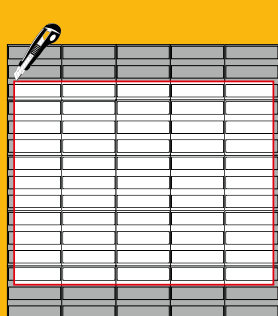

## Taking shape

Use a straight edge and a sharp knife (safety knife) to cut the CONNECT modules to the required shape. Simply cut off excess matting and adapt the clean-off zone to the shape of the installation frame.

## Start & finish

When installing the matting, start in the centre and work out towards the sides. Ensure that the mat is big enough by laying it over the area to be covered, leaving a generous overlap on all sides. Then mark the cutting edges and cut to size with the safety knife. The result couldn't look or fit better!

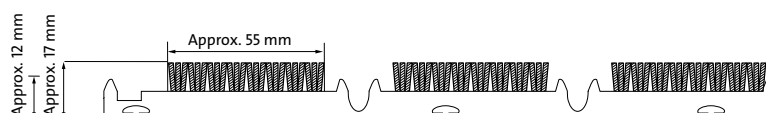

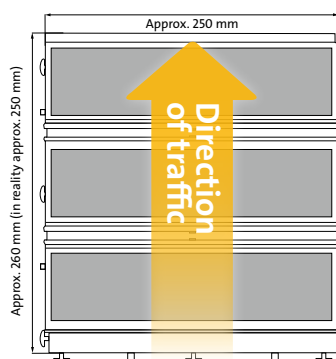

**TIP:** To avoid shrinkage (in the event of significant temperature fluctuations, for example), complete the installation by bonding the modules to the floor.

# Flexibility in terms of both function and colour

CONNEXX CONNECT is ideal if you like the personal touch. As well as being easy to cut (so you can fit them to whatever shape you like), the CONNECT modules are available in 2 different insert types. Each insert type comes in 4 different colours, so there's bound to be a perfect match for your architectural concept.

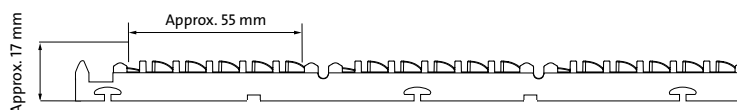

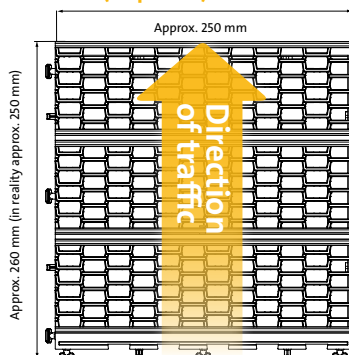

## 12 mm | 17 mm (16 pieces)

The substrate material of the modular CONNECT modules is made from soft PVC (black matt). Each module has three panels for Focus or Maximus type inserts.

| Height | Weight m <sup>2</sup> | Stationary load             | Slip resistance properties | Footfall                 |
|--------|-----------------------|-----------------------------|----------------------------|--------------------------|
| 12 mm  | 9,8 kg                | 1000 kg/100 cm <sup>2</sup> | R11                        | High, up to 2000 per day |
| 17 mm  | 12,0 kg               |                             |                            |                          |

## 17 mm (16 pieces) Outdoor

The substrate material of the modular CONNECT modules is made from soft PVC (black matt). Grooves on the bottom of the mat drain any moisture that accumulates.

| Weight m <sup>2</sup> | Footfall                 |
|-----------------------|--------------------------|
| 11,2 kg               | High, up to 2000 per day |

## Focus

Anthracite 25.01

Grey 25.02

Brown 25.03

Red 25.04

Focus is a durable clean off matting system with a high performance structured dual fibre using 100% polyamide with a pile weight of 1030g/m<sup>2</sup>. The coarse fibre brushes away the dirt while the finer fibres contains the moisture. Focus is suitable for areas with very high footfall.

## Maximus

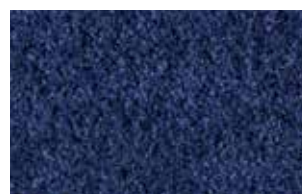

Black mottled 81.01

Grey mottled 81.03

Brown mottled 81.04

Blue 80.06

Maximus is a tufted velour cut pile clean off matting system using 100% polyamide with a pile weight of 1000g/m<sup>2</sup>. It is dimensionally stable, abrasion proof, achieves optimum cleaning performance while containing high levels of moisture.

## Frame 500

500 aluminium

500 in stainless steel

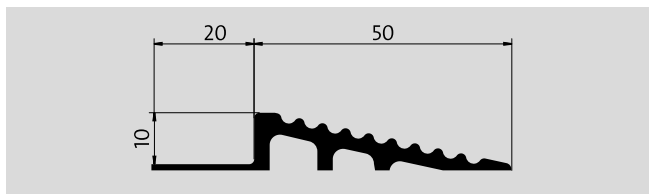

The frame 500 consist of angled profiles with mitred corners. The sturdy gusset plates supplied ensure a screw connection that is true to size. Products available for delivery includes wall anchors; stainless steel versions for use in damp areas are available as an option. The frame is supplied either ready for assembly or preassembled (e.g. in the case of frames with curved sections or several sections, etc.).

| Type     | M height | Dimensions (H x W x D) in mm | Material         |
|----------|----------|------------------------------|------------------|
| 500 / 13 | 12 mm    | 15,5 x 25 x 3                | Aluminium        |
| 500 / 20 | 17 mm    | 20 x 30 x 3                  | Aluminium        |
|          |          | 20 x 25 x 3                  | Stainless steel* |

Maximum one-piece length: 2200 mm

\*Material no. 1.4301 (V2A)

## Ramp Edge for CONNECT 12

With its gradient, the ramp edge (with a profiled tread surface made from soft PVC) guarantees stumble-free access onto the mat. If the floor is a homogenous PVC/vinyl base, the mat must be laid so that it is securely fastened to the floor.
